COMMERCIAL OPERATIONS / UI-UX / INTEGRATIONS / TRANSFORMATION

Mike Palmer

I connect business problems to better systems.

Commercial and systems leader with hands-on experience across ecommerce, marketplaces, digital product design, APIs, Amazon Vendor EDI, reporting and operational change. I understand the people and processes behind the problem, shape the practical solution and help make it work in the real world.

SKILLS AND CAPABILITIES

UI/UX and customer journeys	**APIs and connectivity**	**EDI and Vendor workflows**
Systems and platform selection	**Process and workflow automation**	**Commercial and marketplace strategy**
Data and reporting	**Product ownership and delivery**	**Stakeholders, training and change**

PROFESSIONAL EXPERIENCE

Nemesis Now | Marketplace Manager

2026 - present

Amazon Vendor and Seller performance, new marketplace channel onboarding, partner relationships, data/reporting improvements and the design of connected operational workflows.

KhooCommerce | Key Account Manager

2025 - 2026

Amazon Vendor client management; EDI/AS2 and order-flow troubleshooting; PO, ASN, invoice and chargeback exceptions; implementation support, training and customer engagement.

Pyramid International | Director of Systems / Head of B2C & Digital Trading

8 years

Systems and trading leadership, multi-channel ecommerce, Linnworks selection, order-routing automation, B2B website/checkout UX, and cross-functional operational improvements.

A SELECTION OF EXPERIENCE

01 / PLATFORMS Multi-channel consolidation

Personally evaluated and selected Linnworks to support DTC and marketplace trading operations.

02 / AUTOMATION International B2B order mapping

Worked with the ERP provider on reusable order mappings, covering around 40% of customer accounts and all key accounts across a base of 1,000+ international customers.

03 / CUSTOMER EXPERIENCE B2B ecommerce improvements

Improved customer-facing product language, interface usability and card/PayPal checkout to reduce ordering and payment friction.

Breadth through real work

Commercial depth, technical fluency and product thinking, applied across different environments.

04 / EDI Amazon Vendor compliance and troubleshooting

Supported new vendor-code EDI setup; investigated missing ORDERS, AS2 feeds, carton/ASN mismatches and invoice exceptions. Coordinated customers, Amazon and internal teams.

05 / API New channel integrations

Worked through stock and order integrations for Wayfair and Faire, including mapping, feed expectations and operational handover.

06 / DATA Marketplace decision support

Designed MP Desk around product master information, channel performance, rebates, forecasts and operational tasks to join information into a more useful view.

PRODUCTS AND SIDE PROJECTS

FFN APP Mobile club management

Unified availability, payments, participation statistics and weekly progress. Designed player/admin journeys and iterated the live platform.

MFFL PORTAL League operations and publishing

Connected registrations, eligibility, fixtures, results, role-based tools and public content through a shared data source.

MP DESK Commercial workspace

Product master, marketplace reporting, vendor rebate analysis and linked operational workflows. Employer information remains confidential.

THE LAB SquadLab, CM 01/02 Remastered and ShieldNet

Explored decision-support filtering, legacy UI redesign and network/device monitoring using existing hardware.

HOW I WORK

Understand the problem. Observe the process and ask the people doing the job. **Design the better way.** Map requirements, data and user journeys. **Bring people with me.** Communicate, train and get buy-in. **Deliver and improve.** Make the solution useful, then iterate through real feedback.

Technical scope: hands-on product building and integration troubleshooting, plus collaboration with specialist teams and suppliers. Experience is presented at the level actually undertaken; this is not a claim to personally engineer every underlying protocol.
